

Baotite**Ba₄(Ti, Nb)₈Si₄O₂₈Cl**

©2001 Mineral Data Publishing, version 1.2

Crystal Data: Tetragonal. *Point Group:* 4/*m* As crystals, to 10 cm; as subhedral crystals and grains.

Physical Properties: *Cleavage:* Fair on {110}. *Fracture:* Hackly. *Tenacity:* Brittle. Hardness = 6 VHN = 769 D(meas.) = 4.42–4.71 D(calc.) = 4.69

Optical Properties: Translucent to transparent. *Color:* Light brown to black. *Luster:* Nearly semimetallic to vitreous.

Optical Class: Uniaxial (+). *Pleochroism:* Strong; *O* = colorless; *E* = dark brownish to light greenish yellow. *Absorption:* *E* > *O*. $\omega = 1.94$ $\epsilon = 2.16$

Cell Data: *Space Group:* *I*₄/a. *a* = 19.2–20.022 *c* = 5.908–6.006 *Z* = 16

X-ray Powder Pattern: Ravalli Co., Montana, USA.

1.335 (100), 1.422 (25), 3.139 (10), 1.763 (9.5), 3.516 (9), 2.234 (9), 1.351 (9)

(1) Baiyun-Obo mine, China; corresponds to (Ba_{3.82}Ca_{0.11})_{Σ=3.93}(Ti_{5.84}Nb_{1.35}Fe_{0.60}Al_{0.18})_{Σ=7.97}(Si_{3.68}Al_{0.32})_{Σ=4.00}O₂₈Cl_{0.88}. (2) Šebkovice, Czech Republic; by electron microprobe, corresponding to (Ba_{4.00}Ca_{0.06})_{Σ=4.06}(Ti_{7.91}Fe_{0.04}Al_{0.02}Nb_{0.01})_{Σ=7.98}(Si_{3.99}Al_{0.01})_{Σ=4.00}O₂₈Cl_{0.73}.

Occurrence: In quartz veins cutting quartzite near alkalic granite and syenite (Baiyun-Obo mine, China); in a carbonate vein cutting “hornblende” gneiss intruded by diabase sills and small pegmatites (Ravalli Co., Montana, USA).

Association: Quartz, calcite, aegirine, galena, pyrite, alkalic amphiboles (Baiyun-Obo mine, China); calcite, dolomite, ancylite, aeschynite, monazite, sodic amphiboles, barite (Ravalli Co., Montana, USA); benitoite, bario-orthojoaquinite, fresnoite, natrolite (Gem mine, California, USA).

Distribution: In China, from the Baiyun-Obo mine, near Pao-t’ou, Inner Mongolia. In the USA, on Sheep Creek, Ravalli Co., Montana, and at the Gem mine, San Benito Co., California. From Šebkovice, Czech Republic. At Karlstein and Jarolden, Waldviertel region, Austria. In the Garaoulère mine, Pierrefitte, Hautes-Pyrénées, France.

Name: For the locality, Pao-t’ou (Baotou in Russian), China.

Type Material: National School of Mines, Paris, France.
