

Crystal Data: Monoclinic. *Point Group:* 2/m. Small crystals are typically distorted, dipyrarnidal { $\bar{1}11$ } and {110}, tabular on { $\bar{1}11$ }, commonly in parallel growths; globular to stalactitic. *Twinning:* Common, according to an undetermined law.

Physical Properties: *Fracture:* Conchoidal to uneven. *Tenacity:* Brittle. Hardness = 2.5 D(meas.) = 3.03–3.07 D(calc.) = 3.097 Slowly soluble in H₂O.

Optical Properties: Transparent when unoxidized. *Color:* Sulfur-yellow, yellowish brown to reddish brown; blue, colorless. *Luster:* Vitreous.

Optical Class: Biaxial (+). *Orientation:* Y = b; X ∧ c = -26°. *Dispersion:* r > v, strong. α = 1.591 β = 1.623 γ = 1.663 2V(meas.) = 80°

Cell Data: *Space Group:* C2/c (synthetic). a = 7.078(3) b = 7.549(3) c = 7.773(3) β = 118.65(2)° Z = 4

X-ray Powder Pattern: Synthetic.

ZnO	0.14		Total	101.07	100.00

(1) Smolník, Slovakia. (2) FeSO₄·H₂O.

Mineral Group: Kieserite group.

Occurrence: An uncommon secondary mineral formed in pyrite-rich oxidized sulfide deposits, typically under highly acid and arid conditions.

Association: Rhomboclase, halotrichite, fibroferrite, römerite, copiapite, voltaite, pyrite.

Distribution: Widespread in small amounts. Several localities for studied material include: from Smolník (Szomolnok), 16 km northeast of Rožňava, Slovakia. On Valachov Hill, near Skřiváň, and at Kladno, Czech Republic. From the Staszic mine, Rudki, Poland. In the Clara mine, near Oberwolfach, Black Forest, Germany. From the Crumlin colliery, Ebbw Vale, Gwent, Wales. At Quetena, west of Calama, and Alcaparrosa, near Cerritos Bayos, southwest of Calama, Antofagasta, Chile. From the Santa Elena mine, Quebrada de La Alcaparrosa, San Juan Province, Argentina. In the USA, from the Tintic Standard mine, near Dividend, East Tintic district, Utah Co., Utah; at Bisbee, Cochise Co. and in the Magma mine, Pinal Co., Arizona; from the Goldstrike mine, Lynn district, Eureka Co., Nevada; at the Island Mountain mine, Trinity Co., California. From Saghand, Yazd, Iran.

Name: For the first recognized occurrence at Szomolnok, Hungary (now Smolník, Slovakia).

Type Material: The type specimens were destroyed in 1956 at the Natural History Museum, Budapest, Hungary.
